

Ice Bin

User' Manual

Model: BB400

INSTALLATION OF LEGS

Place the bin on its side and attach the legs (Fig 1). Take out the four legs from the accessory. Twist the legs directly into the bottom of the ice storage bin.

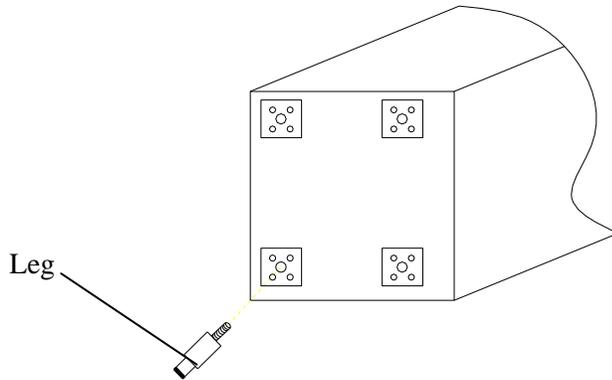

Fig. 1

INSTALLATION OF HOSE

Insert the drain hose firmly onto the drain pipe at the back of the unit and secure it with the supplied ties (Fig.2).

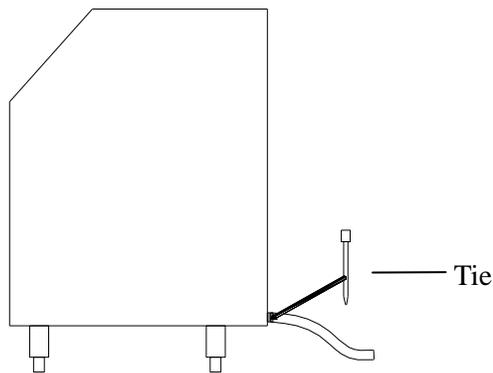

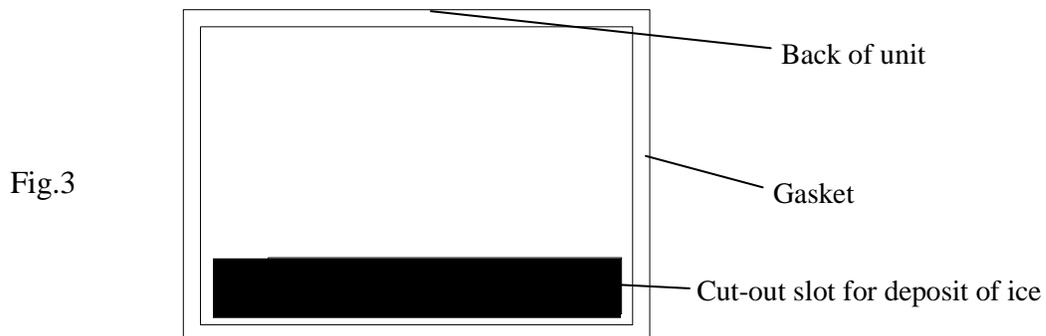

Fig.2

INSTALLATION OF STORAGE BIN

Top View of Ice Bin

- 1) Be sure the gasket is in place on the top surface of the bin as shown in Fig.3.
- 2) Place the ice-making unit on top of the bin and make sure it is properly aligned with the sides and back edge.
- 3) Turn the brackets at the back of the ice bin and align them with the holes in the bottom of the ice-making unit (Fig. 4). Fasten the brackets in place with the screws supplied (Fig.5).
- 4) Place the assembly in its final location. Make sure it is level by using a carpenter's level and rotating the adjustable feet on the legs. Apply sealant as necessary between ice maker and bin.

CLEANING AND MAINTENANCE

CAUTION

If the ice bin is left unused for a long time, before the next use it should be thoroughly cleaned. Do not leave any solution inside the bin after cleaning.

Never keep anything other than ice in the bin. Objects like wine and beer bottles and soda cans are unsanitary, and labels may slip off and plug up the drain hole.

The plastic inner liner of the ice bin must be cleaned and sanitized before use. We suggest wiping or spraying the liner with a solution of 1 ounce of household bleach in 2 gallons of hot water (95° to 115°F). Rinse thoroughly with clean water and drain the bin.

The exterior stainless steel surfaces can be cleaned with a stainless steel cleaner such as 3M Stainless Steel Cleaner & Polish or the equivalent.

The interior of the bin should be cleaned and sanitized periodically as described above to ensure clean, sanitary ice. Be sure the bin is empty of ice before cleaning the interior.
