Compressor uses 1/4hp for 27"-32" and 1/3hp for 48"-60". System has the capacity of maintaining between -5°F (-20°C) and 0°F (-18°C) in heavy use food service operations. Refrigerant is metered using a highly responsive thermostatic expansion valve on 1/3hp systems and a capillary tube on 1/4hp systems. System is controlled using an electronic temperature control which provides improved pull-down times, reducing

compressor cycling and longer compressor life with lower energy consumption. Control system uses adaptive defrost to assure evaporator coil is free of ice and operating at optimum efficiency. Evaporator condensate is eliminated using an energy efficient hot gas system.

Digital exterior temperature display is located on the back of the cabinet.

Electrical connection is 115 volt, 60 Hertz, single phase. Unit has a 8' (2.4m) long electrical cord and NEMA 5-15P plug.

Casters: 5" (13cm) diameter plate casters shipped loose with front two locking. Equipment clearance above the floor is 6.2" (15.7cm).
