ABC SERIES GAS BOILERLESS COMBI OVEN STEAMER

WATER QUALITY STATEMENT:

The fact that a water supply is potable is no guarantee that it is suitable for steam generation. All steam equipment is subject to contamination and failure due to chemical and mineral content found in water. A suitable Hobart Water Treatment System and regular filter replacements coupled with routine deliming is the recommended minimum. Damage as a result of poor water quality or lack of required owner/operator maintenance is the responsibility of the owner/operator.

Your water supply must be within these general guidelines:

DYNAMIC WATER PRESSURE	30 - 60 psig
HARDNESS*	1 - 3 grains
SILICA	less than 13 ppm
TOTAL CHLORIDE	less than 30 ppm
pH RANGE	7-8
CHLORINE & CHLORAMINE	0 ppm
ALKALINITY	less than 20 ppm
TDS	less than 60 ppm
UN-DISSOLVED SOLIDS	less than 5 microns

* 17.1 ppm = 1 grain of hardness

Other factors affecting steam generation are iron content, amount of chlorination and dissolved gases. Water supplies vary from state to state and from locations within a state. Therefore it is necessary that the local water treatment specialist be consulted before the installation of any steam generating equipment.

USER RESPONSIBILITY:

The product must be installed, cleaned and maintained as described in the Manual furnished with the product. It is the responsibility of the owner and installer to comply with local codes.

SERVICE CONNECTIONS:

Water: ¾" NSHT female split water line connections (filtered and unfiltered).

Drain: 1" NPT male connection piped to open drain, 60" maximum length before open air gap and not more than two bends or elbows.

Electrical: 120 Volt, 15 Amp, NEMA 5-15P plug and cord.

Gas: 80,000 BTU, ¾" NPT female connection. Supply gas pressure should be: Natural gas 5" - 10.5" W.C.; Propane gas 11" - 13" W.C.

NOTE:

Clearance: Left 1", Back 4", Right 3" required, 18" recommended for service access on right side.

The spark ignition in this appliance can cause electrical noise that can false trigger the GFCI detection. Some GFCI's are more sensitive than others. The use of a higher trip tolerance GFCI will reduce nuisance tripping. Contact Technical Support for more information.

MACHINE WEIGHT: 600 lbs.
