**AUTOMATIC
JUICERS**

J 80 Ultra • J 100 Ultra

NEW

BARS – TAKEAWAY OUTLETS – RESTAURANTS – HOTELS – HEALTH FACILITIES

▶ J 80 Ultra AUTOMATIC JUICER

Pulp ejected straight into container.
Supplied with 6.5-Quart large-capacity pulp container with translucent sides to monitor pulp levels.

▶ J 100 Ultra AUTOMATIC JUICER

« Specially designed for intensive use »

ERGONOMICS

Removable stainless-steel basket

Drip tray

No-splash spout

PERFORMANCE

Exclusive to Robot-Coupe

Auto Feed system for continuous throughput

LONG LIFESPAN

Stainless-steel bowl and motor unit for easy aftercare

POWER

1 HP

1.3 HP

Ultra-quiet heavy-duty motor

NEW

▶ J 100 Ultra AUTOMATIC JUICER

2 WAYS OF USING YOUR JUICER

1 Continuous pulp ejection

Ejection chute
sending
continuous flow
of pulp directly
into bin under
worktop.

2 Pulp ejected into container

7.5 Qt
large-capacity
translucent pulp
container

UNIQUE INNOVATION

AUTOMATIC JUICERS

J 80 Ultra • J 100 Ultra

Patented automatic feed tube with a diameter of 3 inches for continuous throughput and hassle-free juicing.

**7 SECONDS
=
A GLASS OF
ULTRA-FRESH
JUICE!**

AUTOMATIC JUICERS

J 80 Ultra • J 100 Ultra

Product benefits:

- **Automatic:** the unique design of the feed tube does away with the need for a pusher! You can now produce high volumes of top-quality juice quickly and effortlessly!
- **High power, low noise levels:** the powerful, heavy-duty motor operates at a speed of 3450 rpm, meaning that the juice oxidizes less quickly. The resulting juices are particularly smooth and bursting with flavour. The noise levels of the J 80 Ultra/J 100 Ultra are so low that they can be used right in front of the customer.
- **Practical:** the drip tray can hold up to 10 oz of liquid, meaning that your worktop stays clean.
- **Large-capacity pulp container!** the 6.5-Quart (J 80 Ultra) or the 7.5-Quart (J 100 Ultra) translucent container slots neatly under the ejector spout, to avoid pulp splashing onto the worktop.

The J 100 Ultra can be used in two ways:

1. Continuous pulp ejection: ejection chute sending a continuous flow of pulp directly into a bin beneath the worktop.
 2. Pulp ejected into a container: 7.5-Quart large-capacity translucent pulp container.
- **Centrifugal juicer basket:** the basket can be removed (no special tool required) for easy cleaning.

Users:

Bars, takeaway outlets, restaurants, hotels, canteens, health related establishments

In short:

They have all the qualities you could ask for in a juicer: fast, resilient, efficient, and top-quality juice.

INDUCTION MOTOR

- Heavy-duty motor designed to withstand intensive use for greater reliability and a longer lifespan.
- Ball bearing-supported motor for ultra-quiet, vibration-free operation.
- Direct-drive motor:
 - extra power
 - no belt
- Maintenance-free: no wearing parts (no brushes)
- Stainless-steel motor shaft

	Electrical characteristics			Dimensions Inches				Weight (lbs)
