User Instruction:

- Inspect the product for any signs of damage.
- It is important to pre-oil the caster wheels to insure ease of operation.
- Before using food transporter systems, make sure to open the doors and clean the inner Pan compartments thoroughly with mild food safe cleaning solution
- Always place food in container with the cover secured.
- Make sure the molded handles and latches are closed securely.
- Vent caps on the door front are adjustable for the purpose of equalizing outside and inner compartment pressure, making the doors easy to open.
