

Patriot Platinum gas ranges are constructed of a stainless steel front, backriser, shelf and feet with galvanized sides. Each 30,000 BTU burner has its own 12"x12" removable cast iron grate with standing pilot light and individual control knob for quick, instant lighting. The convection oven has a total BTU output of 31,000 BTU/hr. The interior of the oven is constructed of all steel with a porcelain oven liner. The oven thermostat adjusts from 220°F- 490°F and is equipped with a flame failure safety device. 3/4" rear NPT gas connection.

This item meets the sanitation standards imposed by the ETL, a division of the Intertek Group.

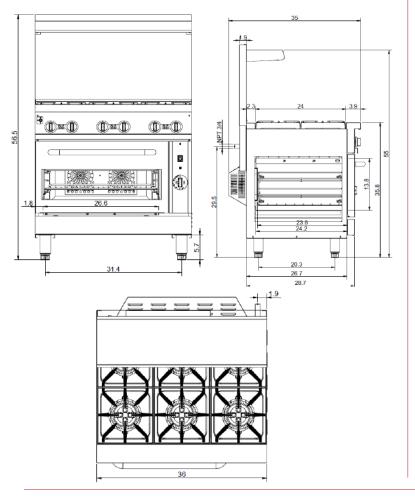

This item meets the electrical product safety standards imposed by the ETL, a division of the Intertek Group, for use in the United States and Canada.

## **Features**

- 211,000 BTU/hr total output
- Thermal coupling safety valve for the oven
- Cooling switch to reduce oven temperature quickly
- Two circulating fans to ensure even temperature
- Includes 2 adjustable oven racks with 5 positions
- Cool to touch stainless steel oven door handle
- U shaped oven burner
- Cord and plug included for 120V fan motor
- Individual pilot light for each burner
- Spring loaded door with cool to touch handle
- Removable crumb tray for easy cleaning
- 5" Casters included, range ships with legs installed
- Ships Natural Gas with a LPG conversion kit included

## **Specifications**

Model Number	PT-RGR36C
Total BTU/hr	211,000 BTU
Overall Dimensions (in)	36"W x 35"D x 56.5"H
Oven Cavity Dimensions	26.6"W x 23.5"D x 13.8"H
Temperature Range	220°F - 490°F
Net Weight (lbs)	368 lbs
Gross Weight (lbs)	456 lbs
Fit Full Size Pan	Yes
Crumb Tray	1
Burners	6
