

Patriot 40 lb. electric floor fryers are designed to maximize efficiency by providing an all purpose affordable fryer for any kitchen. The fully submersed heating elements maintain full contact with the oil and provide quick recovery times and lower energy consumption. The large cold zone design below the cooking area helps to conserve oil and reduce flavor contamination from different types of food. These fryers do not come with a plug and cord and need to be hardwired by a professional.

This item meets the sanitation standards imposed by the ETL, a division of the Intertek Group.

This item meets the electrical product safety standards imposed by the ETL, a division of the Intertek Group, for use in the United States and Canada.
