

36" Six Burner Gas Range with a Standard Oven

Argus gas ranges are constructed of a stainless steel front, backriser, shelf and feet with galvanized sides. Each 30,000 BTU burner has its own 12"x12" removable cast iron grate with standing pilot light and individual control knob for quick, instant lighting. The standard oven has a total BTU output of 30,000 BTU/hr. The interior of the oven is constructed of all steel with a porcelain oven liner on the bottom. The oven thermostat adjusts from 250°F- 550°F and is equipped with a flame failure safety device. 3/4" rear NPT gas connection.

This item meets the sanitation standards imposed by the ETL, a division of the Intertek Group.

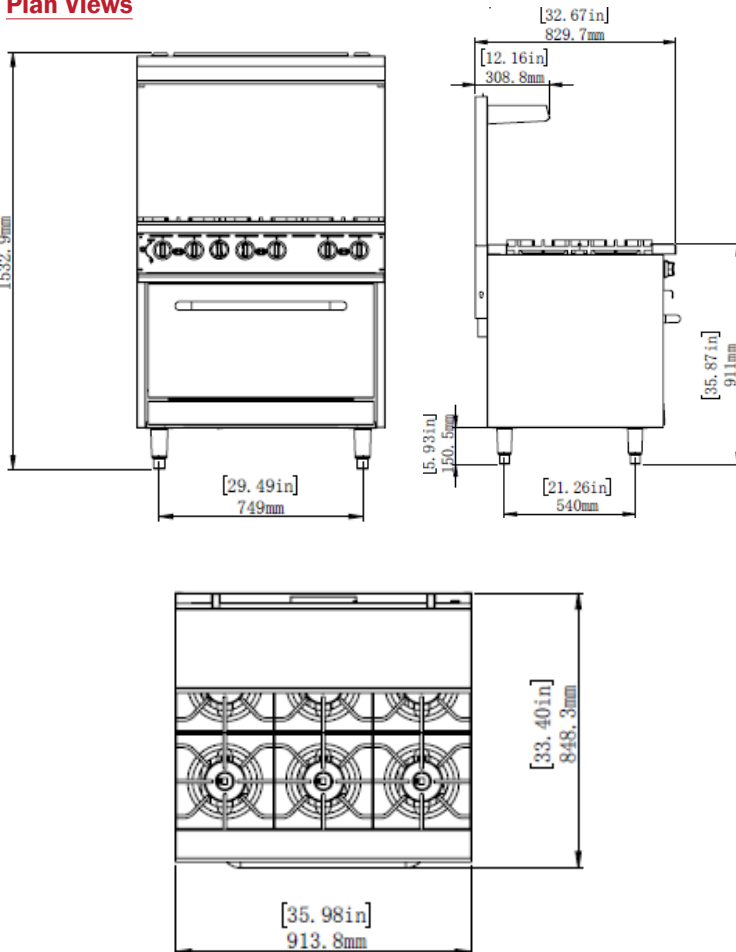

This item meets the electrical product safety standards imposed by the ETL, a division of the Intertek Group, for use in the United States and Canada.

HFSO-36
